Winners at Bridge.

A very charming evening was spent by those who attended the Bridge party held on Monday in Kelly's Hall. The affair was sponsored by the newly-formed Skoo Ski club, and there were some 14 tables in use. A delightful lunch was served under Miss Bertha Wudel. Dancing was enjoyed after cards. H. Larson played the piano.

The winners—
Lady's 1st—Mrs. B. Lutes
Lady's 2nd—Mrs. L. Wudel.
Gent's—H. B. Bjork 1. Clarence Anderson
Lucky winner of skills—Mrs. J. F. Clarke

The Sagebrush Trail.

The attraction for this (Thurs.) Evg. the 29th at the local movie theater will be that well-known favorite John Wayne in his new-out picture "The Sagebrush Trail." This is a Lone Star Western film, and those who have seen John Wayne in his other pictures will be sure not to miss seeing his last-out on the 29th.

Wallace Berry was much in the limelight as Jerry the boatman in "Tugboat Annie," the picture on the screen last Thursday. His antics, in no matter what character he represents, and his whimsicalities have made him very popular with local movie fans.

Hockey Teams Practise.

Both hockey teams were out on the ice at the local rink Sunday afternoon, for the first practice. The Senior team is much the same, with the exception of the absence of Harold Outway and Edward Mayer, two aces of last season's team. It will take another practice or two before the regular alignment is made of the players.

With the Juvenile players, this seems to be a composite team, as those who have their names down on this team for the new uniform shows this to be a mixed outfit—a few leftovers from the Juniors, some regular Juveniles, and a pair of six-footers. Some of those not listed at practice are P & Wm Cannon, G. Trapp, W. Larson, Pailer, A. Wudel, L. Miller, W. Forster, A. Dusholka, Geo. Michael, F. Mayer.

The C. G. I. T.

The organization meeting of the Senior C.G.I.T. group was held at the home of Mrs. C. A. Gates, Thurs. Nov. 22. The following officers being elected, with Miss Woods as leader.

Pres., Mary Campbell
V. Pres., Erna Michael
Sec. Treas., Betty Schwalbe
It was arranged to hold meetings on alternate Mondays from 7 to 8:30 p.m., in their club room at the rear of the church.

The theme for the year being "To strive, to seek, to find and not to yield."

The Junior CGIT group with Mrs. Watt as leader was organized several weeks ago, with the following officers—

Pres., Olive Kowensky
V. pres. Margaret Gannon
Sec., Edith Cooper
Treas. Berta Oppertshausen
The meetings are held at the home of Mrs. Watt every Monday Evg. from 7:30 to 8:30.

Says Production On Farms Should Be Governed By The Requirements Of The Market

Consumer research and adaptation of its findings to production were advocated as the solution of agricultural problems by Dr. Horace Barton, deputy minister of agriculture, in an address. He was speaking at a dinner of the western Ontario branch of the Canadian Society of Technical Agriculturists.

"Consumption has been taken too much for granted in the past," the government said. "It should be examined thoroughly in all phases. Canadian farmers should find out what appeals to Canadians and direct production accordingly. They had been looking too much to the export market."

Service to the consumer should be the object of all production, Dr. Barton believed. This solution he placed in opposition to three previously advanced solutions for glutted markets of alternative production, control of production and elimination of production or producer.

Cost of marketing was relatively higher than production cost, he declared. There were too elaborate facilities in a very complicated marketing machinery, though necessary to transfer produce from 750,000 farmers to 10,000,000 people. Although there had been a tendency to centralize marketing, the farmer was having less and less to do with it. "The farmer does not understand the system, but he must produce to live and he had no alternative but to accept the price offered."

Marketing was a "neutral" state and the only approach to the problem was through a research mind. Material of the problem should be investigated, examined and analyzed.

Great Britain was determined to bring her farmers back to prosperity and to carry out the provisions of the Marketing Act, said E. D. Barrow, former minister of agriculture in British Columbia. He recently returned from a visit to the British Isles. Already improvement was to be seen among the farmers.

Observations Were Useful

U.S. Dairy Industry Department Discovers Facts About Making Butter

Each fat globule in cream carries an electric charge investigators in the dairy industry department of the University of Wisconsin have discovered in an investigation into the time it takes to make butter out of cream. They found this time varied with the degree of acidity of the cream, and that the amount of electricity also varied with this factor. There is no danger of getting an electric shock from drinking a glass of milk or from the more concentrated charges in a pat of butter, as experience has shown. They found that the observations were useful, nevertheless because it gave them a means of controlling the time of making and in reducing the time required to make butter. The less acid the cream the stronger the negative charge on the fat globules. The more acid the cream the less negative was the charge, and finally a point was reached at which the decreasing acidity resulted in an increasing positive charge on the globules.

Incense Still Fragrant

Produces Aromatic Fumes Although Believed 3,000 Years Old

Incense more than 2,000 years old has been found by archaeologists in the Balkan sea bank near Tanager on the Sea of Azov. The incense, a mixture of pitch and vegetable oils, still produces aromatic fumes when set burning. It was found in a number of ancient black lacquer vessels on the site of a Scythian burial ground dating from the second or third century B.C.

Generous Housewife — "And how would you like a nice chop?"

Wary Tramp—"Dat all depend, lady—is it lamb, pork or wood?"

A U.S. warship bought 15,000 pounds of beef from a Florida drug store. The captain happened in to get a bottle of maulage.

Twenty-Six Million Eggs

Most Profitable Of Food Fishes Is The Ling

The ling, the most prolific of food fishes, lays over 26,000,000 eggs during the spawning period while the herring only averages 30,000. The turbot is the second most prolific fish, averaging 9,000,000 eggs while the cod comes next with 5,000,000. All this seems contradictory when one considers the millions of herrings landed annually compared with the number of other fishes. The reason is that all the eggs laid by these fish do not come to maturity. The eggs of the ling for instance, float on the water and many are eaten by other fish. The herrings eggs sink and thus escape destruction. The amount of fish landed in Britain last year was 16,118,132 cwt., valued at £13,981,546.

Modern Craze For Speed

Has Become Sort Of Disease With Some People

Citing speed records made by trains recently the Ottawa Journal asks "Why the hurry?" In these days, the Journal says, a person may pick up a telephone and speak to anybody almost anywhere, or send a wire, so it can't be terribly important that he may get to a destination a day or a few hours sooner than ordinary, shooting along at 118 miles an hour on a train weighing thousands of tons to do so.

Isn't it the truth that it's the man who is usually going nowhere in particular or who has time to burn on his hands who has the greatest craving for speed? Take some motorists. They will drive like fury through the country passing everything in sight and at the end of the journey kill hour after hour of time doing nothing. The man who has a real honest-to-goodness mission to fulfil generally takes a reasonable amount of time to make the journey; his chief aim is to get there safely.

This craving for speed has become a sort of disease with some people. It isn't fair, however, to find fault with the railroads for creating faster trains. They have to cater to people who want speed and if those people do not receive such service from the railroads they will patronize the airlines on whatever else gets them through space in record time.—St. Thomas Times-Journal.

Nothing New About It

Noted World Figures Had Wives Older Than Themselves

Miss Martha Dickinson, who issues marriage licenses at Windsor, Ontario, notes a tendency of men to marry women older than themselves. In reality there is nothing new about that. Among world noted figures Shakespeare when 18 years of age married Ann Hathaway then 26. The famous British statesman D'Israeli was much younger than his spouse and there are many other similar instances. Among ordinary folk a like disparity frequently exists and probably always will do so.—Brantford Expositor.

The hedgehog, captive of Mexico can live five years without a drop of water. When it rains it fills up its central pithy section until it swells to nearly twice its normal size.

The SNAPSHOT GUILD BABY PICTURES

No doubt about it, the babies themselves "directed" these snapshots. In other words, they did as they pleased and the camera was clicked at the right instant.

There aren't any official statistics that we know of, so we're perfectly safe in saying that babies constitute the largest single group of snapshot subjects.

It's perfectly reasonable that this should be so; for we snapshot those things in which we are most interested. For another thing, babies make ideal subjects, because they don't pose. They're always natural.

There are baby pictures and baby pictures, of course. Some arouse spontaneous enthusiasm; others are merely records, without much appeal.

What's the essential difference between the good and the merely so-so baby pictures. Usually you'll find, the good pictures show infants doing something—crawling, chewing a doll, wrestling with toes, or even indulging in a real giggle. The merely so-so pictures give us only recognizable glimpses of babies doing nothing much at all.

Of course, it's possible to take a picture of a sleeping baby and get a charming result. But to do this, the camera work must be unusual. Very few, what about the technique of baby pictures?

First, you'll need to have light enough for action pictures. Few babies stay still long enough for time exposures, so you'll have no trouble at all working in

Central Seed Cleaning Plant System Developing Steadily During The Past Ten Years

Secret Of His Success

Great Polish Pianist Practices Many Hours Every Day

Ignace Paderewski was, and possibly still is, the greatest piano player in the world. At any rate his name is surrounded by more glamour than any other pianist living, and despite the fact that he is nearly 75 years of age, he is the greatest drawing card before the public so far as piano art is concerned.

A noted New York music critic visited him at his home in Paris recently to see if he had anything to say about his forthcoming tour in the United States. "What am I doing?" he repeated, "echoing the interviewer's question. 'I am working hard to polish my technique.'"

So the mighty Paderewski is still trying to improve his technique. And there are lots of great players before the public who feel that they would be better than he are if they could play even less well than the famous Pole.

The truly great artist is never satisfied. The truly great artist is constantly striving to do even better. Paderewski, who practices six or seven hours a day when preparing for a tour, says that if he misses one day's practice he notices a difference himself; if he misses two days the critics notice it; if he misses three days the public notices it.—St. Thomas Times-Journal.

Potato Yield Higher

All Provinces Except Saskatchewan And Alberta Showed Increase

An increase of 5,447,000 hundred-weight in the estimated yield of potatoes throughout Canada compared with 1933 is shown in the potato, root and fodder crop report issued by the Dominion bureau of statistics. This was due to an increase of 41,000 in the acreage and four cent. in the yield per acre. All provinces except Saskatchewan and Alberta showed increases, particularly good harvests being reported from the Maritime provinces.

The seed grower who markets his seed cleaned and graded has the same status as the manufacturer who turns out a finished article and thereby realizes the highest return for his product. Further, the farmer who sells a finished product has a definite incentive to produce the best, while on the other hand the low prices obtained by weed infested crops constitute the hard lesson by which the grower learns to improve his methods and produce cleaner crops.

Comparatively few farmers are equipped with the means for properly cleaning the seed they grow. The carefully operated fanning mill will clean grain satisfactorily only when the common impurities are to be taken out, but under the ordinary farm conditions it is almost impossible to accomplish similar results with clover and timothy seed. Fortunately, the central cleaning plant system has been developing steadily during the past ten years, and has become a highly specialized business in several areas particularly in the Ottawa Valley district. These central cleaning plants, equipped with several types of machines for cleaning and grading seed of cereals, clovers, grasses and other farm crops, are performing services of inestimable value to the various communities but more especially to the farmers who have seed as a cash crop. The plants are being operated successfully at many rates for seed cleaning and have been established either with or without government financial assistance. A three-unit plant, provided with complete machinery and equipment, is equal to the speed cleaning requirements of most farm communities and costs about \$1,200.

Added to the advantage of being able to grow bigger and better crops, the seed producer, particularly of clover and timothy, and other farm crops, is performing services of inestimable value to the various communities but more especially to the farmers who have seed as a cash crop. The plants are being operated successfully at many rates for seed cleaning and have been established either with or without government financial assistance. A three-unit plant, provided with complete machinery and equipment, is equal to the speed cleaning requirements of most farm communities and costs about \$1,200.

Raising the standard of the seed used of both grain and forage crops, with increased yields, is a result directly attributable to the central cleaning plant in every community in which one has been established, and in the Ottawa Valley, apart from the fact that the 24 central cleaning plants in 1933 turned out 75,000 pounds of grass and clover seed, sealed as Certified No. 1 grade, and 8,000 bushels of cereal seed of Registered grade, the improvement in yield and quality through the cleaning plants was extended to barley growers as well. Large quantities of high class barley are now being produced in that area and are now finding a ready and profitable market with malting companies in Canada. The malting companies accept the grain without cleaning before shipping, over 200 carloads of malting barley being shipped out of the Ottawa Valley in 1933, and more than 250 from this year's crop.

Scotland Likes Canadian Eggs

The following is an extract from a report by the Canadian Trade Commissioner in Scotland on recent shipment of Canadian eggs to that country: "The consignment states that the Canadian egg this fall turned out very well indeed, and are a credit to Canadian shippers. They hope that the shippers will keep up this high standard of quality and thus help to encourage the trade."

Airplanes cannot fly in an inverted position for any great distance.

More than 467,000 tons of water pass over Niagara Falls every minute.

JOHN VAN GUILDER.

Try KRUSCHEN NOW!

At no expense to you

If you suffer from rheumatism, sciatica, lumbago or neuritis you should try Kruschen Salt right away because your druggist is offering a FREE trial of Kruschen for a limited time only. Ask him for the Kruschen Salt Package which contains a regular bottle and a FREE Trial Bottle. After using the Trial bottle, continue with the Regular bottle—unless you are made completely convinced that Kruschen will do everything claimed for it, in which event your druggist will return your money if you take back the regular package unopened.

But millions of people testify as to Kruschen's effectiveness, for in 119 different countries nothing else has been found that gives the same results as Kruschen. Get your package without delay. The supply of Free Trial bottles is limited.

WORLD HAPPENINGS BRIEFLY TOLD

A giant flying boat with a cruising range of 3,000 miles and intended ultimately for experimental flights across the Pacific ocean is now being tested for air worthiness.

Fred Huran, Canadian Pacific telegraph messenger, found three pearls in a quantity of oysters bought at a Woodstock, Ontario, fish store. One pearl was valued at \$35 by a jeweler.

J. N. Cartier, of Montreal, has been appointed vice-chairman of the Canadian Radio Commission. The announcement was made by Minister of Marine Alfred Durnaulx. Mr. Cartier succeeds Thomas Maher, who resigned in August.

Rear-Admiral Richard E. Byrd flew deep into southeast Antarctica, and reported he had made important discoveries of conditions in the thousands of unexplored square miles covered in the first few hours of the tour.

The medical faculty of McGill University, Montreal, will receive a bequest estimated at \$100,000 from the late Mrs. Blanche Elsie Payne Hutchinson, proclaimed at \$163,000 in supreme court before Mr. Justice H. B. Robertson.

Dowager Queen Marie of Roumania hopes to visit North America again some time soon, taking her grandson, young King Peter of Yugoslavia, with her. From there she hopes to continue on around the world.

Purchase of 50,000 pounds of beef by the Alberta relief commission for distribution as food for relief purposes and as a measure to partially relieve the extremely critical beef market at the present time, was announced by Hon. F. S. Grisdale, minister of agriculture for Alberta.

Duplication Of Names

Freighter Belonging To Glasgow Company Also Called "Queen Mary"

It has been discovered that there is a small freighter called Queen Mary belonging to a Glasgow company, the owners of which have generously changed the name of their packet to Queen Mary II. Some years ago, not knowing that there was a rachore called Cyclops, an Englishman chose the same name for his horse. Registration was refused and he called it Cyclops II. But registration was again refused because there was already a Cyclops II. So he named his horse, Cyclops Too. Possibly we shall see a Queen Mary Too, too.—St. Thomas Times-Journal.

Approximately 11,800,000 words are spoken by the average man every year.

Little Journeys In Science

BACTERIA IN THE SERVICE OF MAN

(By Gordon H. Guest, M.A.)

Scientists believe that bacteria were the first form of life on the earth. Many people believe that to be a form of animal life, but such is not the case, for they are minute plants which can only be observed with the aid of a microscope. These small one-celled organisms are very important because all plant and animal life depends on them. Every person has millions of them in his body, some of which are beneficial. Others cause illness.

All infectious diseases are due to bacteria. They cause tuberculosis and influenza by gaining entrance to the blood stream, where they multiply very rapidly. Typhoid fever, trench fever, hydrophobia and the black plague are also due to these organisms, which result in death if they get beyond control.

Some bacteria are very useful to man, and contribute much to his well-being. Bawdies could not be changed into leather without the use of certain bacteria, and it would be impossible to make certain kinds of cheese without their assistance. Some of the bacteria will be interesting to know that special tobacco flavors are due not so much to the tobacco itself as to certain kinds of bacteria which take part in the curing of the leaves.

The list of services that bacteria perform for man is almost endless, but perhaps the most important one is the changing of iron into a form which it can be used. The steel age really depends upon bacteria. Most of our bog iron ore deposits have been laid down by means of iron bacteria. Iron deposits of the pre-Cambrian stratified rocks, the age of which is estimated at approximately six million years, are believed to be of bacterial origin. This process of iron formation goes on actively all the time and it is known that certain peat bogs in Minnesota have areas in which the surface deposit contains as much as ninety per cent. of iron ore produced by iron bacteria.

British Columbia Sugar

Beet Factory Proposed

Believed Farmers In Fraser Valley Would Benefit Greatly

Establishment of a sugar beet factory on the lower mainland of British Columbia would be a boon to Fraser Valley farmers and would provide work for hundreds of unemployed, according to experts who have thoroughly investigated the possibilities.

A factory, to be practical, would cost not less than \$1,000,000. Such a plant, however, would consume 100,000 tons of B.C. sugar beets annually and would produce a return to the farmers of at least \$600,000.

The coal mining industry would benefit as the plant would use 6,000 tons of coal or coke for fuel each year and 6,000 tons of limestone for clarification purposes.

Output would be approximately 12,000 tons of refined sugar, which at current price would bring the plant \$1,500,000. In addition 4,000 tons of molasses and more than 5,000 tons of dry beet pulp would be manufactured.

At least 400 men would be employed in the factory.

Experts state the establishment of a sugar beet factory depends on the solution of four major problems. 1. Federal government excise tax of one cent per pound. 2. Continuity of a sufficient supply of raw material. 3. Freight charges. 4. Market possibilities.

Wonderful New Scales

Can Weigh Impurities In Gas Within Few Minutes

A scales which can weigh the impurities in a gas has been announced at the University of Kansas. The scales weigh directly something hitherto left largely to mathematics, namely the molar weight, which is the sum of the weights of the atoms forming a molecule. This weight depends on not only the number of atoms, but also on how closely they are packed together. The new scales give these weights in a few minutes. Other methods have required hours.

She: "I'm very glad you've got in the dramatic society's next show. Have you much to say?"

He: "Practically nothing. I'm playing the part of a husband."

Experts declare that the bed of clay below London protects the city against earthquakes.

CAN'T SLIP OR SLIDE FALSE TEETH

Don't use any old kind of remedy to keep false teeth in place—use a reliable, recognized one which dentists prescribe such as Dr. Wincinac's False Teeth. Largest seller in the world—grip teeth so secure yet comfortable they feel natural. Easily slipped or slipped on—blissful comfort assured all day long. Forms a perfect cushion to cushion to protect and support. No colored gum—my paste—keeps mouth sanitary—breath pleasant. Inexpensive—all druggists.

Sacrificing A Village

English Town Submerged To Increase Manchester's Water Supply

The tiny English village of Marcle has been evacuated in order that plans may be carried out for increasing Manchester's water supply. This will result in the village being submerged. A huge dam is to be erected at the north end of Haveswater, raising the water level by 95 feet and increasing the length of the lake from two miles to four miles and a half. Two years ago Manchester postponed an ambitious scheme in connection with Haveswater on the grounds of economy, and the proposed measure now in hand is only a part of what was once contemplated.

Buying Special Privileges

Large Sums Paid In Past For This Purpose

Lord Nelson's perpetual pension of £5,000 a year is to be bought out, and his is the last of such pensions. In 1924 the £25,000 a year granted in 1793 to Lord Rodney for his great victory over the French was commuted for a sum of \$42,000. Large sums have been paid in the past to buy out the privileges of certain peers. The duty of a shilling on every ton of coal exported from the Tyne, granted to the Duke of Richmond and his heirs in 1676, was redeemed by a payment of £633,333. The Duke of St. Albans received £18,355 in compensation for his ducal Master of the Hawks, while £478,000 was paid to a former Duke of Atholl in exchange for his sovereign rights in the Isle of Man.

London-Paris Route Lighted

The airway stretching 225 miles between London and Paris has now been illuminated for night flying. There are 14 flashing beacons giving an identical signal in Morse code, and seven Neon fog-piercing beacons. Many many night flyers have their lights altered so that they project guides for both airmen and seamen.

Mourning Doves: Their Habits and Migration

By JACK MINER.

Among my earliest recollections of my dear mother is how she would gather up her children and try to teach us how to distinguish the different birds. It was easy to tell the Red-Headed Woodpecker from the Black Bird and so forth, but to tell the Mourning Dove from the Pigeon was a different problem as both were the same color and build. Yes, the Pigeon was fully twice as large as the dove, but to tell an old pigeon in the distance from a dove clove, kept our children and I guessing but as years rolled on all became an open book and we discovered that the doves nested close to the ground, while the few pigeons nests that we found were in the tip tops of the highest and thickest trees. In 1878 we came to Canada,

beaten me and was spreading out her warm breast over them. Owing to my excitement I had forgotten to band him but I went back the next day and neither baby dove had died. I allowed me to catch and band the one that had flown away.

Doves return here in March, and start to lay eggs in the nest from three to five times. They lay two pure white eggs that hatch in thirteen days. To hide and protect their first egg from their egg eating enemies, the old dove usually sits on it and lays another egg the following day. Consequently one of these twins is twenty-four hours the oldest. I have known them to fly in ten days, but usually from twelve to fifteen days. This year we have found seven nests on the ground in the cornfields. The doves' only protection from their natural enemies is their speed and their ability to select color and lay eggs in the most hidden places. I often see one hundred or more rise out of a corn field, when disturbed and pursued by a winged enemy.

Last year I banded about five hundred and eighty doves. Sixty-seven of these were reported shot by sportsmen, Georgia, Alabama and Florida reporting forty-three of the sixty-seven. But the first one reported was killed near Kingsville, Texas, on September 27th, and there were many more doves here at that date.

The pigeon's real home was the virgin forest, but the dove followed the farmers on the ground and came to the southern part of the Prairie Provinces, but strange to me I have seen them in Nova Scotia or in Brunswick. Three years ago I saw a bunch on that nice bit of farming country near Lake's Head, in the Bruce Peninsula. I have seen them on Manitoulin Island, and this year I banded them in Ontario. I have every reason to believe that the younger generations are going to see them in the future as James Bay. In closing I wish to say that Mourning Dove is one of the best birds we have on the farm. He eats and digests more seed of grain than any other bird in America. I sent his stomach to be analysed. The following is the report: This dove's stomach was not quarter full. If a

Jack Miner examining a doves' nest on his Bird Sanctuary.

and found that Mourning Doves were very rare and almost unknown from 1910 to 1915 I got the Sanctuary fever and started planting trees in earnest and the delight of my heart was that the same birds seemed to know this whole place was theirs and the shy, cooling doves became as friendly as sparrows and nested and multiplied by leaps and bounds. From 1927 to 1930 I had one hundred occupied doves' nests on one acre, but in 1931 and 1932 the starlings drove them out and killed their choice nesting trees. In January 1933 we cut the dead trees down and the touchy pitiful part of it is several pairs of doves returned and nested on the ground where their nesting trees had been cut down. Previous to this I had seen three doves' nests on the ground.

A dove built a nest very low beside one of my pine needle paths. As soon as the two young doves could raise their heads I would stop and speak to them. This happened two or three times a day for nearly a week, but one morning I reached to catch them and to my surprise one flew out. I tried to catch the other but it was too late. I was so disappointed and thought it had alighted near the edge of the big goose pond. So after I had washed the one I went to catch the other, but it was not there and as I looked up I saw a small bird sitting on the ground among the ripples on the pond. A second glance and I saw that the pigeon was the little dove out fully 50 feet from the shore. Oh! what a loss! By the time I would get to the house and return with rubber boots, the dove will have drowned and I at once sat down and started to pull off my shoes. It will innocent bird and get him, but I looked up again and this time the little innocent bird evidently knew I was his friend for he started hopping and swimming toward me. I sat still and he landed within ten feet of me, his wet wings drooped, and he looked and staggered up the bank the best he could. I put both my warm hands about him and dried him, and he swam with my hands over the two in the nest and finally went away. I returned in about ten minutes, but mother had

OLD PEOPLE FEEL YOUNG

Just because more years than you care to count have fled by on your life's calendar is no reason for feeling old. You can feel young for the rest of your life. It is a matter of health. Stay vigorous and you stay young. But you can't stay young by taking thousands of people of advancing years. Take Wincinac's regularity. Wincinac is a delicious wine and from drugs, that brings you all the valuable elements of grapes combined with the highest grade beef and guaranteed malt extract. Its invigorating action is almost magical—yet perfectly natural.

These valuable elements in Wincinac give your aging system exactly the stimulating nourishment it requires. They soothe your nerves, enrich your blood, and flood your whole body with almost youthful buoyancy and vigor.

More than 20,000 medical men have heartily endorsed Wincinac. It is a great tonic. It will make you feel young again by creating for you new stores of strength and energy. Get Wincinac from your druggist. Agents: Harold F. Ritchie & Co. Ltd., Toronto.

SUNDAY SCHOOL LESSON

DECEMBER 2

THE CHRISTIAN AS WITNESS

Golden text: "But ye shall receive power, when the Holy Spirit is come unto you; and ye shall be my witnesses both in Jerusalem, and in all Judaea and Samaria, and unto the uttermost part of the earth." Acts 1:8. Lesson: 1 Thessalonians 1:1-10. Devotional reading: Psalm 107:1-9.

Explanations And Comments

Thanksgiving for their Witnessing, verses 6-10. "Be ye imitators of me, even as I also am of Christ," Paul wrote to the Thessalonians. Here he thanks the Thessalonians for having imitated him and the Lord; and that, notwithstanding the "affliction" at the hands of men so enraged that they had followed Paul to Berea and induced the authorities to turn him out of that city also (Acts 17), they had remained steadfast in the faith. A good example is given to all believers in Macedonia (of which province Thessalonica was the capital) and the word of the Lord is proclaimed to the Thessalonians, the capital of the province of Achaia, Greece.)

Not only had they loyally proclaimed the word of the Lord in Macedonia and Achaia but everywhere where they had gone their faith in Christ had been made known. Those living in the places visited by Paul or from which he had had reports had informed him how the Thessalonians had turned from idols to God, to serve him, and to wait for the second coming of Jesus whom he had raised from the dead and who delivers us from the wrath to come. Paul's teaching in this letter is that the best way to prepare for Christ's coming is to live a life of love and service now.

Ye are the light of the world. A city set on a hill cannot be hid. Neither do men light a candle and put it under the bushel, but on the stand; and it shineth unto all that are in the house. Even so let your light shine before men; that they may see your good works, and glorify your Father who is in heaven. "Not Up to the Sample." Several years ago a Chinese came to visit this country. He had the opportunity to see a man who had something of Christianity in a so-called Christian land. At the close of his visit he said: "I have seen a man who is not a Christian, but a man who is a Christian in the way of life and in the way of service."

When a commercial traveller takes an order from a merchant he guarantees that the goods, when delivered, will be as good as the sample otherwise the purchaser is not obliged to accept the consignment.

This Chinese, while not a professing Christian, had read the New Testament. From it he had learned what ought to be seen in those who profess to follow him. In "Christian" America he had made the painful discovery that the majority of the people whom he met here were not living in accord with the life of Jesus.

Contrary to common belief, the eating quality of old carrots is as good or better than that of young carrots, says a Cornell crop specialist.

CHILDREN'S CONSTIPATION

Ended!

Mrs. E. T. Rogers, Athens, Ont., writes: "My baby boy was troubled with constipation. I gave him Dr. Williams' Pink Pills for Pale People. Before I had given him the box he was constipated. By relieving constipation, baby's ailments developed. Much easier to take than nauseating laxatives and pure food. I got him out of the two boxes to children's diet package."

Dr. Williams' Pink Pills

BABY'S OWN TABLETS

NO INCREASE IN WHEAT DEMAND IS ANTICIPATED

Budapest.—The international wheat commission struck at the nationalistic policies of wheat importing countries in a strongly-worded statement on the world grain situation.

The statement painted a gloomy picture for exporting countries for at least two more years, predicting the annual world demand for exported wheat would remain at 400,000,000 bushels until at least August, 1936.

Concerning the demands of importing countries, the commission said "until there is a fundamental change in the wheat policy of importing countries there is no prospect of a considerable increase in demand for wheat unless yield per acre proved to be of low average."

Owing to the present policy of some important countries of protecting—almost regardless of cost—their wheat growers against foreign competition and a sharp upward trend of unit yields, the commission's statement continued, "there seems to be no good reason for anticipating in the next few years an annual European demand for imported wheat in excess of 450,000,000 bushels."

"As a result of Japan's policy to become self-sufficing in wheat," the statement said, "and of the great expansion of wheat growing in several European countries, it is impossible the annual imports of European countries will in the near future be more than about 150,000,000 bushels."

"The world demand for imported wheat in recent years has declined 20 to 25 per cent. below what was looked upon as normal prior to 1932. "As both the trend of population growth and that of per capita consumption of wheat are declining in many countries, it is clear that any appreciable increase in world demand is largely dependent upon a reversal of the trend of wheat production in importing countries."

The commission also took to task optimists who forecast improvement because of droughts, so that "during August suggestions were made that the effect of widespread drought would be to convert the position of over-production to one of relative scarcity, and that as a result a substantial rise in wheat prices might be anticipated."

Germany's Planes Swifter

So France Wants Huge Sum To Build Better Machines

Paris.—Minister of Air Victor Demail told France that Germany's planes are "swifter and more modern and asked 3,500,000,000 francs (about \$230,000,000) to make the French air force superior.

"Since Goring (Herman Wilhelm Goering, Adolf Hitler's minister of air) came to power, Germany has a military air fleet available and proclaims it," Demail told the chamber air committee.

"This air force is to be feared because it is composed of modern pursuit and bombing planes," he said.

Protesting against "panic fomenters" who pretend Germany has thousands of military planes, the air minister estimated that the Reich will have 1,000 to 1,100 planes at the beginning of 1935.

France has more machines, he admitted, but the French models "are less swift and less modern."

Drug To Lengthen Life

Claim It Increases Resistance To Disease And Reduces Worry

Cleveland, O.—Human life can be lengthened, at least a little, by use of a drug that is claimed to reduce worry and increase resistance to disease, Dr. Wilder D. Bancroft of Cornell University predicted before the National Academy of Sciences.

He has not tried it on humans yet, but based his predictions on preliminary tests on rabbits and chickens. The drug is sodium rhodanate, used in other experiments by Dr. Bancroft to treat drug addicts.

Opponents Will Be Heard

Poultry Pool Objectors To Come Before Marketing Board

Ottawa, Ont.—The Dominion marketing board has announced that the second week of December will be set aside for the hearing of representations of those who are opposed to the poultry scheme sponsored by the three prairie poultry pools.

The board has received many petitions from the west, opposing the schemes and several organizations have written seeking an opportunity to appear before the board. Every opportunity will be given to these organizations. The actual dates for hearings have not yet been fixed, but it is believed that one week will enable all those opposed to the schemes to be heard.

Meantime, the board is making little headway with other schemes. The latter proposal advanced by the National Dairy Council is being held in abeyance pending the outcome of a conference to be held this week at Toronto. It is believed that this scheme is rapidly losing favor in official quarters and its chances of being approved by the board are regarded as doubtful.

The livestock scheme proposed by the Saskatchewan Livestock Co-operative is still at the preliminary stage. The board has not yet come to grips with it.

Urges Building Program

Could Be Handled As Government Policy Says Stevens

Ottawa.—With the declaration that during the next few years Canada "could wisely and economically spend over a billion dollars in housing and commercial construction works," Hon. H. H. Stevens, former minister of trade and commerce, went on record as favoring a great building program for the Dominion.

Characterizing the government's \$40,000,000 building program as "a mere drop in the bucket," Mr. Stevens advocated calling a conference of bankers, loan and mortgage companies and insurance companies, with a view to evolving a plan for financing his huge construction proposal.

"If they fail to act promptly," he added, "then in my opinion the government of Canada ought to take the matter in hand as a government policy."

The former minister and chairman of the trade buying committee was guest speaker at a banquet of the Ottawa Junior board of trade.

Self Rule For India

Federal System Is Advocated By Select Committee

London.—An all-Indian federation comprised of self-governing units was advocated in the long-awaited report of the select joint parliamentary committee on Indian reform.

The report urges this system be substituted for the present centralized government. Eleven provinces of British India, two of them new, would be linked in the federal system with the native Indian states, which would enter the federation by voluntary act of their rulers.

These recommendations in the main follow the proposals laid down in the governmental white paper of last year for reform of Indian government in the direction of granting self-rule "with safeguards," in other words still reserving control over vital questions of defence, external relations, and the like, to the viceroy and through him the British government, while extending internal self-government to the new legislatures.

Government Buys Building

Old Industrial Building At Winnipeg Acquired From C.N.R.

Ottawa.—The Dominion government has purchased from the Canadian National Railways the old industrial building in Winnipeg adjacent to the railway terminal there, on the corner of Main and Water streets. The purchase price was \$175,000. The industrial building will be razed and a seven-storey department building will be erected in its place. It will be an office building, one floor of which will be rented to the railway to house its officials occupying the present structure.

FARM CLUBS SECRETARY

Here is a photograph of A. E. McLaurin, who, as General Secretary of the Canadian Boys' and Girls' Farm Clubs, is largely responsible for the successful results obtained in this junior club work throughout the Dominion. Thirty-two club teams, representing all of the Provinces of the Dominion, competed in several livestock and field crop judging contests at the Royal Winter Fair in Toronto.

Vessels Collide In Fog

Four Lose Lives In Accident On Great Lakes

Alpena, Mich.—Four members of the crew of the steamer W. C. Franz were lost in a collision in heavy fog, 30 miles south by east of Thunder Bay Island, Lake Huron, between the Franz and the Edward E. Loomis.

A message from the steamer Reiss Brothers, standing by, verified by O. K. Falor, operator of a radio station at Rogers City, said the Franz sank and that 14 survivors of its crew had been taken aboard the Loomis, which was proceeding south under its own power, with considerable water in its forward hold.

The Franz had a crew of 18. Radio messages said the Loomis was badly damaged forward in the collision.

The Franz had delivered a cargo of wheat at Port Colborne, Ont., and was upbound for another load of grain.

Budget May Be Cut

But Manitoba Government Is Not Closing Government House

Winnipeg.—W. J. Tupper, newly-appointed lieutenant-governor of Manitoba, will be sworn in here December 1, it was announced at the legislative buildings. He succeeds Hon. J. D. McGregor, lieutenant-governor since 1929.

Frederick John Bracken of Manitoba, referring to rumors Government House might be closed, declared there might be reductions in the government budget for Government House. It was not the government's intention to close it, he said.

LOS ANGELES MUSIC TEACHER HELD BY NAZIS

Above is a picture of Miss Isobel Steele, pretty young music teacher of Los Angeles, whose long imprisonment in Germany on charges of alleged espionage is the subject of a diplomatic protest by the United States Government.

Grasshopper Problem

North Dakota Conference Says Emergency Still Exists

Fargo, N.D.—The grasshopper problem was characterized as a national rather than a state problem by state entomologists attending the closing session of the second annual "hopper conference" here.

Experts from several northwest states and Canadian provinces adopted resolutions recommending an annual grasshopper egg survey by the federal government in co-operation with the various states and an adequate appropriation to the bureau of entomology for this purpose.

In other resolutions the group went on record as of the opinion that a grasshopper emergency still exists. Although various speakers said the pest danger had been reduced by poison campaigns and the drought, one resolution said "the grasshopper outlook for 1935 is most serious in North Dakota, Minnesota, Wisconsin, and Michigan."

New Relief Policy

Ontario Minister of Welfare Would Place Single Men In Private Homes

Toronto.—Hon. David A. Croil, Ontario minister of welfare and municipal affairs, announced a new relief policy affecting single men. Under this plan municipalities will be encouraged to place single unemployed in private homes.

"Homes, not hostels—that is what we are aiming at," said the minister in announcing a plan whereby municipal authorities may pay for lodgings in private homes at a rate not exceeding \$1 per week and supply food by voucher at the prevailing rate. If such a policy is adopted locally the province will pay its share of the cost, the minister said.

"That is our idea of the first step towards re-establishment of the individual. Let him get away from the barracks-like atmosphere of the hostel and return to a normal domestic existence," Mr. Croil stated.

Out Of The Market

United States Did Not Export Any Wheat Last Week

Washington.—For the first time since the west's fertile prairies were tilled with regularity, the United States last week failed to export a single bushel of wheat.

"The drought and steadily declining exports," was the explanation given by officials, who said they were not surprised at the department of commerce report.

Only a few years ago, 370,000,000 bushels of the grain were sent out of the United States in one year, and exports averaged around 150,000,000 annually up to 1929.

Since that time Canada and the Argentine have cut more and more into the market once held by the United States.

JAPAN CONTINUES ITS INSISTENCE ON NAVAL PARITY

London.—The outlook for the tri-power naval conversations became gloomier than ever, with a Japanese declaration that in the very likely event of failing to reach an agreement on tonnage limitation of navies, she could not agree to limitation of specific types of vessels and their gunpower.

This was taken to mean that if a tri-power agreement on total naval tonnage is not reached, replacing the Washington treaty which Japan is going to denounce, then Japan is prepared to experiment with vessels she believes peculiarly suited to her needs.

The Japanese indeed made themselves very clear, removing a couple more misconceptions which made it plain the best the British and Americans can hope for, so far as tripartite agreement is concerned, is to salvage as much as they can of the Washington agreement. And there does not seem to be much that can be saved.

First, the Japanese denied the widely-accepted version of their demand for parity with the British and Americans, to the effect that while insisting on being granted parity she would not actually build up to it. This was a complete misconception. Reuters was told by Ambassador Tsumoto Matsuda.

"The actual position is that Japan, if accorded parity, might not need to build up to it in all categories," he said. "But she has certainly made no statement that she would not."

The other "misconception" the Japanese removed was a report they had declared themselves not averse to having a fleet inferior to the British, so long as the Japanese fleet was equal to the American. The Japanese emphatically declared they want full equality with both the British and the Americans. The inference is that if this is not conceded by treaty, Japan will independently build up to it.

The statement that Japan cannot accept restriction of tonnage of various types of vessels and gunpower in the different classes, if there is no agreement on total tonnage, clearly heralded independent action unless she is granted parity, which is distinctly not the case.

Admiral Yamamoto, naval delegate, was responsible for the statement regarding refusal to accept qualitative restriction.

The clarification of the Japanese position made more understandable the British refusal to agree to the United States in the hope of getting a multilateral naval pact to which the Japanese would be invited to join later.

Indicates Improvement In Business Conditions

Flea For Lower Freight Rates Is Good Sign

Winnipeg.—Numerous applications for freight rate reductions were filed by F. Napoleon Garceau, K.C., deputy chief of the board of railway commissioners, as an indication of improving business conditions.

"People think they have a demand for their products, or they hope to find markets, and that is why they are making applications for rate reductions," said Mr. Garceau. The full years of 1932 and 1933 produced few applications, he said.

The commission opened sessions to hear applications of local nature. It is returning east after sittings in Victoria, Vancouver, Nelson, Edmonton, Saskatoon, Moose Jaw and Swift Current.

May Visit America

Belgrade, Yugo-Slavia.—Dowager Queen Marie of Roumania hopes to visit North America again some time soon, taking her grandson, young King Peter of Yugo-Slavia, with her. From there she hopes to continue on around the world.

Amsterdam.—K. D. Parmentier and J. J. Moll, Dutch aviators who won the recent handicap air race from London to Melbourne, landed their transport plane recently to the cheers of 50,000 persons.

The Rally Day service of the United Church Sunday school will be held Sunday, Dec. 9, at 7.30 p.m. Instead of the usual readings, a pageant entitled "Sunday School Visitors from Far Places" will be given. All are welcome.

On Saturday Next.

Under the auspices of the United Church Ladies' Aid the annual bazaar and chicken supper will be held in the church on Saturday Aft., Dec. 1; Bazaar opening at 3 p.m. There will be an array of fancy articles as well as plain sewing—which will make excellent Christmas gifts; so be on hand early to get your choice. The lucky draw for the beautiful Christmas Cakes will also be made that day. 35c. is the admission to the supper for adults and 25c for children under 12. Supper will be served from 5.30 to 7.

Frost—Marsan.

On Saturday, Nov. 17, a pretty wedding was solemnized at Saint Dominic's R. C. Church, Duffield, when Aimee, daughter of Arman Marsan, was united in marriage to Mr. Sidney Frost, son of Edward Frost.

The ceremony was performed by Rev. C. Keenan in the presence of a large congregation of friends and neighbors.

The bride was given in marriage by her father. Miss Margaret Perry presided at the organ.

Mr and Mrs. Frost will reside in Duffield.

THE NEWS OF STONY PLAIN AND DISTRICT.

Mr. Jos. Best, secretary of Inga Municipality, will again be in Stony Plain on Friday, Dec. 14, to collect taxes. The tax penalty goes on the following day, the 15th.

Phil Alt, Edmonton, was a Sunday visitor in Stony.

R. C. Howat, Reeve of Inga, was a business visitor here on Monday.

Miss Amy Foerster has had charge of the senior room at the local Public school, for several days, in the absence of the regular teacher.

At the meeting on Saturday Eve. of the Executive of the Stony Plain curling club Mr. A. E. Michael resigned from the committee. On the advice of his physician, Mr. Michael does not intend to curl this season.

Miss Carrie Metzler has opened a Dressmaker's Shop, Plain Sewing, Pressing and Cleaning, in the Foerster building, Main St. Reasonable charges.

BUTTER AND EGGS WANTED at The Royal Cafe.

Hennig—Lozenboom.

The wedding took place at St. John's Lutheran Church, Golden Spike, when Miss Ida Lozenboom, daughter of Mr and Mrs Harry Lozenboom, of Barhead, became the bride of Mr Edward Hennig, son of Mr and Mrs Michael Hennig, of Golden Spike. The ceremony was performed Monday, Nov. 26, by the pastor, Rev. P. Hanneman. The bride was a former resident of Golden Spike.

Schmidt—Adolf.

On Nov. 20, at St. John's Lutheran Church at Golden Spike, Miss Elizabeth Adolf, daughter of Mr and Mrs Ph. Adolf, became the bride of Carl Schmidt, son of Mr and Mrs Julius Schmidt of Golden Spike; the ceremony being performed by Pastor P. Hanneman.

TOWN OF STONY PLAIN.

Notice is hereby given that, under the provisions of The Tax Recovery Act, 1929, the Town of Stony Plain will offer for sale by public auction, in the Town Hall, Stony Plain, on Saturday, the 8th day of December, 1934, at 2 o'clock in the afternoon, the following lands situated within the town, viz:

Lots	Block	Plan	Area	Block	Plan	Area
19 to 25 (incl.)	4	4180H	19, 20, 21 and 22	6	4180H

THE WHEAT SURPLUS

The world's "carry-over" of wheat since 1928 has been about 1,100 million bushels each year instead of a normal of 625 million. Authorities estimate that by August 1st next the "carry-over" will be reduced to a figure between 725 and 825 million, or still show over 100 million bushels more than normal. A great shortage of coarse grains, however, is apparent throughout the world. Some expect that a substantial part of the world's wheat "carry-over" will be used to replace coarse grains. If this should occur, no doubt, wheat prices will tend to rise—otherwise they may not do so due to low purchasing power of European bread-eating people.

THE TENDERFOOT

By
GEORGE B. RODNEY
Author of "The Coronado Trail",
"The Canyon Trail", Etc.

SYNOPSIS

"You've fallen into a half-share in plenty of trouble," the lawyer told Gerald Keene. "The Broken Spur has been systematically looting the ranch, and old Joe Carr, your partner, is drinking him into ruin."

But Keene decided to see what was burning for himself—not at Gerald Keene, but at the owner of the Hour-Glass Ranch, but as Duro Stone, tenderfoot in a Montgomery Ward wilderness outfit.

Dad Kane, desert rat and lighthouse prospector, is now returning to Ted Dustin and Spike Goddard, owners of the Broken Spur ranch, who had grubstaked him, of his discovery of a rich gold mine, and shows samples of it to him. He was then seen running Hour-glass cattle and protesting against it.

Spike Goddard and Sam Dustin, fearing the old prospector may tell others the things he has seen as to the branding of his discovery, get him to show them the location of the mine and then to kill him.

Gerald Keene, dressed in ridiculous cowboy costume, arrives at the Hour-glass ranch and is hired as a cowboy by Joe Carr. The impersonation of a tenderfoot is successful, and he is accepted as such by the other occupants of the bunkhouse.

(Now Go On With The Story)

CHAPTER V.—Continued

"Dustin! That damned crook? I wouldn't let him take care of a three-legged burro that I liked. He's been at the bottom of all our troubles."

"Yeah. I know that but we can't prove it. And that's what counts. Who's this new hand you took on, Joe?"

His hand swept toward the bunkhouse, where Stone stood talking to Lee and Worth, both of whom were laughing.

"Just a new man I picked up today. He came in and asked for a job. We got to have a new man and he's got to be cheap, so I hired him. He can ride fence. He's just a crazy fool who says he wants to learn the cattle business. He told me so when I hired him. He said he wanted to learn it from the ground up. We've got right down to the ground now on the Hour-glass," he said grimly. "He's startin' good. Set him to work in the mornin' ridin' fence on the west line. Did you see his outfit?"

"Did I? I wish I'd looked like that when I was his age. I'd sure have filled the eye of some good-looking girl. Don't borrow troubles, Joe. It'll come fast enough. Give me a share of that drink."

Carr poured him a generous half-portion and shuffled the papers on his desk.

"If I had no more cares than that new hand," he growled, "I'd get drunk for a week. He ain't a bad looking kid. Pity he's such a damned fool. Anybody's a damned fool who tries to make money off cattle unless he's crooked at the start. Duro Stone! That's sure one hell of a name."

Duro Stone seemed stiff and sore

when Lee pulled him from his blankets at daylight.

"Nice fat job for you," he growled.

"Crews, meeting him at the kitchen, gave him his orders briefly.

"You'll ride, fence on the West line. If any points are down, put 'em up at your resting wire. Know how to do it?"

"Sure. Like fence a hog-pasture. I suppose the line is marked."

"I'll show you on the map."

Crews led the way to the office but was stopped by Edith. She was in riding dress and she was eating a hasty sandwich.

"If you're sending him," she nodded at Stone—"out to ride fence, I can show him. I'm going out for a ride and I may as well ride that way. Come on."

Stone followed her out to the corral where his pony stood saddled, and Lee brought Edith's horse from the stable. Two minutes later they plodded their way across the East pasture with its two thousand acres toward the West line.

That West line ran for miles straight North over a yellowing grass mesa. There were many breaks in the wire that there had been no men, or too few, to repair and many points were down. From time to time Stone dismounted, whistling, reset his points, stabled his wire and made the ends fast, and Edith watched every move he made.

Mile after mile that they rode was checked off in red letters in the diary of his life. He had seen many women but never one like this. Her eyes were bright with the Wine of the West. . . . And there is no wine fermented by more man than that is like it.

Her lips were really parted and her cheeks were aglow with a light that has never been seen but by those whose eyes are opened by the gods. She gave to every motion of her horse and rode, a perfect poem, across that sunlit mesa under Duro Stone's adoring eyes. He had never believed that such a woman lived west of the Pillars of Hercules. Himself, fairly well read in the classics, he repeated these lines that Marlowe wrote:

"The face that launched a thousand ships
And burned the tow'ers of Ilium."

Then he turned to her. . . . Helen. . . . Edith. . . . He did not care at all about the name. "That was quite incidental. But he never got a chance to say what was on his mind."

Far below them, below the slope of the hill, a pool of quiet dark water showed like prune-colored silk under four great cotton-wood trees and a few cattle stood far off on the slope of the hill.

"Look there. . . . Edith pointed to the great sweep of the land before them. "You've been with us only a few hours but you must have heard the trouble that we are having."

He nodded. His gaze seemed to center on his horse's ears but he was always conscious of the golden voice. "It's just hard luck," she said. "Hard luck and our own mismanagement."

"Thank God," he thought. "Here is one person sane enough to realize that Fate doesn't sit up at nights to deal us bad hands. She gives us brains to be used. . . . Aloud he said:

"It's a good land but she sure doesn't show much cow-life."

"Let's eat our sandwiches here," she suggested as their ponies hurried them through the brush toward the water, where the springs of those troublesome Soda Springs caught the sunlight. She slipped this bit from her horse's mouth and watched him thrust his muzzle deep in the pool. Then she smiled at Stone, who had dismounted on the "off" side and stood awkwardly watching her.

"You're entirely new to range

work, aren't you?" She pointed accusingly to his unsaddled pony. "We don't, as a rule, unsaddle at work. Might need the pony quickly. It's just a hint. You understand?"

"Oh, yes, and thank you. I'll need a lot of hints: I thought the horse'd like to rest. It seemed tired."

"For Heaven's sake don't call your horse 'It,'" she flared at him. Then she smiled at him again. "There was a refreshing ingenueness about this new hand that amused her. But why under Heaven should any man take up such a life? If her father, who had been a cattlemen for more than fifty years, could not see how could an amateur like this man Stone look for success? She felt vaguely sorry for him."

"How'd you make out in the bunkhouse last night?" she asked. "Sometimes Blaine thinks he's a qualified practical joker."

"He put some sand-spurs inside my shirt," said Stone. "But he was right pleasant about takin' 'em out after I rubbed his nose in 'em."

She laughed a little and to her own astonishment found herself flushing warmly under his eyes.

"I wouldn't let my horse eat all those fox-tails," she said in desperation. "They'll make his mouth sore."

... Look. There's a cow over there."

"The first I've seen to-day."

A big dun cow thrust through the heavy brush followed closely by a bawling calf that struggled for its natural rights. They watched the cow as she flung into the pool, and Edith's face suddenly hardened.

"Look at that cow," she said quickly. "That's one of our Hour-glass cows."

"Now look at the calf."

"Well," Stone looked the calf over intently.

"Don't you see it's got the Broken Spur brand? Haven't you ever read any Western fiction while you were tryin' to prepare yourself to be a cow-puncher? Don't you know that a cow will only raise her own calf? Haven't you ever heard that?"

"Come to think of it, I believe I have," he said slowly. "But look. The cow's a Broken Spur cow, too."

"There on her hind shoulder."

She laughed at the words but she was studying the calf. The Broken Spur brand stood out red and angry.

"Here's your first lesson," she said. "I can see exactly what has happened. Whoever was doing the stealing, got the calf first. Then when the calf was branded, they had to change the brand on the cow."

"If they'd vented the calf it would have shown they'd been tampering with brands. Do you know what a running iron is?"

"Kind of a crooked iron poker, isn't it?" he asked innocently.

"Something like one. I hope you never have to use one. It's used to renew brands. . . . Or to steal with. It just shows I know that she's one of our blooded stock and was a milk-cow at the ranch. Every man of the Hour-glass knows her. Why, her flank is hot yet from the iron."

THE RHYMING OPTIMIST

By Aline Michaelis

NIGHT'S FREEDOM

At night with my windows open To the wide sky's star-strewn arch, The room behind me silent And Earth's footsteps a distant march, I am free with a splendid freedom Which in day I cannot boast, With the deepening shadows about me And above the starry host.

I am free with a soaring freedom For the quest I most desire Down ways of hopes and dreaming While night and silence conspire To bring me such joyous promise As by day I never knew, When I fling my windows open To starlight and thoughts of you!

Penalty That Fits

There is only one adequate punishment for persons who at the wheel of an automobile continuously imperil life and limb of other citizens and that is to deprive them of their driver's license for six months or a year, according to the gravity of their crime, says the Calgary Herald.

Only residents of the New England States are rightfully Yankers.

The Full Value of Cod Liver Oil

PLUS A QUICKER RECOVERY AFTER ILLNESS

To recover the strength and vitality exhausted by illness we must have energized nourishment that can be quickly and easily absorbed by our bodies.

Scott's Emulsion gives you greater recuperative power because it is an easily and quickly digestible form of Cod Liver Oil in a solution of bone building hypophosphates of lime and soda—PLUS values you get in Scott's Emulsion of Cod Liver Oil.

Commemoration Medal

To Issue Medal In Connection With 25th Anniversary Of The King's Accession To The Throne

Arrangements have been made for the issue next year by the royal mint of a medal in commemoration of the 25th anniversary of the King's accession to the throne.

The medal will show on the obverse side specially-drawn crowned effigies of their majesties with the inscription in Roman letters MCMXXV MCMXXV (1910-1935). The reverse side will bear a view of Windsor Castle as the principal house of the royal house of Windsor.

The medal will be issued in two sizes. The larger will be 2 1/2 inches in diameter struck in standard silver and available to the public at a cost of a guinea (approximately \$5) apiece. The smaller, struck in fine silver, will be 1 1/2 inches in diameter and will be obtainable for half a crown (approximately 60 cents).

Special arrangements for sale of the medal in the Dominions will be announced later.

Leaves Money To College

Christian Smith, the German tailor who had pressed the clothes of Dartmouth College students for the past ten years, left his life's savings of \$9,000 to the faculty of the college, the probate of his will disclosed. To a son and daughter he had not seen since the Great War he left \$1 each.

When you are offered something for nothing you should accept it, if you can afford to pay double its value.

Little Helps For This Week

"The Lord is thy keeper, the Lord is thy shade upon thy right hand," Psalm 121:5.

"Great peace have they that love Thy law, and nothing shall offend them," Psalm 119:165.

I rest beneath the Almighty's shade.

My grief expires, my troubles cease.

Thou Lord on whom my soul is stayed.

Will keep me still in perfect peace.

One great sign of the practical recognition of the "divine moment" and of our finding God's tabernacle in it is constant calmness and peace of mind. Events and things come with the moment; but God comes with them too. So that if He comes in the sunshine we find rest and joy, and if He comes in the storm we know He is King of the storms and our hearts are not troubled. God Himself, though possessing a heart filled with the tenderest feelings is nevertheless an everlasting tranquillity, and when we enter into His holy tabernacle our souls necessarily enter into the Tabernacle of rest.—T. C. Upham.

GEORGE J. BRYAN IS THE CHOICE OF THE LIBERAL CONVENTION.

**Selected on the First Ballot, with a Majority Over the Other Contestants---
A Big Attendance of Delegates
from the Constituency's 64
Polling Sub-divisions.**

The Nomination Convention of the Stony Plain Liberal Association opened on Wednesday afternoon, in Stony Plain, with Dr. R. A. Walton presiding, and Mr. A. E. Michael acting as secretary to the Convention.

It was the largest attended Convention held in the town, with 116 accredited delegates present. It was a "closed" Convention, only those passed on by the Credentials Committee being allowed to vote. The delegates were marshalled on the north side of the hall.

The Credentials Committee, appointed by Chairman Walton, comprised: Frank Smith, H. Tyrrel, Jac. Bristow, Wm. Kelly, M. McKinlay.

Delegates from Stony Plain town poll were: Dr. Walton, A. E. Michael, W. Kelly, C. W. Young, I. Umbach, J. P. Gannon, Mrs. Wood, G. J. Bryan, Henry Miller, O. G. Wudel, J. A. Willie.

On nominations for a candidate to represent Stony Plain Constituency in the Legislative Assembly being called for, the following names were offered:

Geo. J. Bryan—by Joseph Wendel
Mrs. C. Wood—by W. Graden
O. G. Wudel, B. G. Powell, D. Brox
The Credentials Committee acted as election scrutineers, and their report showed
Geo. J. Bryan 81 Mrs. Wood 13
O. G. Wudel 10 B. G. Powell 9
D. Brox 3

Following the balloting, speeches were L. A. Gireaux, M.L.A. for Grouard, and Captain Bowen, Edmonton.

THE ANNUAL MEETING.

The annual meeting of the Association was held later in the day, when the following officers were elected:

President, Dr. R. A. Walton
Vice-President, O. G. Wudel
Secretary-Treas., J. P. Gannon

Fish Specials at the Sanitary Meat Market.

A Shipment of the following Fish was received from the Coast yesterday, and are now on sale:

6 pails Muskalyas, 10 lbs. Rollmops,
3 pails Spiced Herring, Bismark style,
1 pail Gaffelbiter, 2 pails Boneless Gaffelbiter,
Anchovies, Breakfast Mackerel, Ryola,
Norway 3K Herring, Flatbread, Fishballs,
Boneless Smoked Herring, Gammelost,
Shrimps, Cove Oysters.

Calendar.

14—Muir Lake Community dance
31—New Year's Eve dance, in Kelly's Hall.

Canada's Game Fields.

Hon. Thomas G. Murphy, Minister of the Interior, reports that this year there has been more than usual interest in Canada's hunting attractions, indicating that the charms of our autumn season and the benefit and enjoyment to be derived from a hunting trip in the Dominion are becoming more widely known. In order to meet the growing number of requests for information on this subject a publication bearing the title "Canada's Game Fields," was issued by the Dept. of the Interior some time ago but so great has been the demand for this new booklet that the original edition was soon exhausted and a reprint was found necessary. Fish and game clubs, railway passenger agents, and travel bureaux, in nearly every part of the United States, in all numbering 2415, were supplied with copies for prospective visitors.

This publication which is distributed by the National Parks Branch, Dept. of the Interior, Ottawa, draws attention to the Dominion's unrivalled opportunities for game hunting.

In Canada as in other countries, the advance of settlement has had its effects on wild life, but thru sane conservation methods the Dominion ranks today as a leading big game country of the world. In the foreword to pamphlet a welcome is extended to sportsmen from other lands.

Solicitor for the Executors,
Stony Plain, Alberta.

Masquerade Dance At Holborn Friday Proves Big Success

Holborn Hall presented a gay, colorful scene on Friday night, on the occasion of the masquerade dance, at least 150 persons turning out, to trip the light fantastic.

There were many good costumes present, and the judges had a difficult task in awarding the prizes. The judges were Mrs. L. M. Larson, Mrs. Schultz, Wm. Barth.

The 1st and 2d ladies prizes were won by Miss Olive Davidson and Miss Elizabeth Williams respectively.

Messrs Harry Williams and Hy Pailer took 1st and 2nd gents prizes.

A special prize offered by Mr. T. J. Hardwick went to Miss Margaret Pailer.

The hall, which has recently been sheeted up on the inside, is very much improved both in looks and in its acoustic properties, and is also much more easily lighted.

Barth's orchestra were in great style, and were much appreciated. There were coffee, cakes and sandwiches in abundance.

Among those noticed in costume were—

Miss T. Neeland, in a man's suit

Miss L. Williams, gipsy

Miss A. Davidson, cow girl

Sidney Wright, gipsy

Howard Aubrey, bell boy

Miss M. Everington, Carnation

Miss J. Everington, rose

K. McKinnon, Geo. Washington

Holborn Happenings.

Mr. Ted Allen was given a big shock of his life when a few friends gathered, at his home for a little party on the 17th.

Miss V. Woodley was 15 years Nov. 25. She celebrated the big event by giving her friends a party.

Sam Everington has commenced to mine coal again. He is planning for a bigger trade than ever this season.

Mr. and Mrs. Hardicoff are planning to move to Edson in the near future. Mr. H. will be hauling ties during the winter.

UFA Nominating Convention.

The UFA nominating convention for the new Edson-Jasper Federal riding will be held in Lator Hall, 10180 100 St., Edmonton, on Wednesday, Dec. 5, at 1.30 p.m.

21 Shopping Days to Christmas.

On the Side.

Another agency opened here on Monday for the sale of skis. 'Tis reported that the general store up at Pickleville is giving away a ski with every sack of flour.

—Senator-elect Whitten of Boise county, Idaho, has a great idea. He favors the legalization of bull fights as a means of ridding the United States of its surplus cattle. In the event of the Senator going in the ring as a bull fighter, Boise county may need a new Senator.

—Following a change of government down in old Ontario, the new Attorney-general, Rosbuck, has ousted Dr. Margaret Paterson as presiding magistrate of the woman's court, Toronto. The lady has a large following with the church societies and women's organizations down there, 'tis said, and it will be interesting to watch the outcome.

—From the Edmonton Bulletin's "I Saw Today": "Donald MacLeod, UFA member for Stony Plain, heading south on 107 street at a rapid pace."

—Church people in the Eastern provinces sure are good hearted. When the appeal went out from the Relief Commission in Saskatchewan for supplies for the needy, Ontario sent 116 cars of fruit and vegetables and the Maritimes sent 29 cars—according to a report from the head office of the United Church.

—This is open season for big game, so here's a hunter's yarn from across the line: Zipp Calder, of Salt Lake City, hunted deer for four days—and saw none. Wednesday night while he was driving down Parley's Canyon a big buck leaped into the highway, drove its antlers thru the radiator of Mr. Calder's car and smashed both headlights. When a deer attacks a man, then its news.

—It is hinted Alberta car owners will ask the provincial government for a \$10. reduction in auto license fees next year. Well, there's no harm in asking.
